Rejected R. 19716

I sort

Statement of the Japanese Government in

virtue of Paragraph 5 of Article 15 of the Covenant of the League

Part I.

Japan's or-operation with the League of Nations.

Japan has taken the greatest interest in the development and succe of the League from the days of its inception. Her successive governments have extended to it for nearly 14 years their hearty co-operation, and her statesmen have devoted their best efforts to the extension of its influence and the enhancement of its prestige. Japan takes pride in recalling the active participation of her representatives in the work of the League. As an original and permanent Member of the Council, she has had many opportunities of co-operation in its beneficient activities, and of these opportunities she has fully availed herself. She regards the League as a most powerful instrument for the good of humanity, and she is only anxious, in the interest of this great experiment in the establishment of universal peace, that the Members of the League shall fully appreciate the situation in the Far East and deal with it in a practical way rather than by formulae and principles.

The present dispute was first brought by China to the consideration of the Council of the League of Nations under Article 11 of the Covenant in September 1931. In spite of the fact that Japan in this case was obliged to act solely in self-defence against aggression on the part of China, Japan, from the very beginning, has spared no effort in explaining to the League the facts and background of this unfortunate incident, and at the same time she has constantly and without waiting for the

.11 INC , 250-B

Resolution passed by the Council on Soptember 30, endeavoured as far as possible not to aggravate the situation. Japan has also from time to time communicated to the League all information relative to the development of the situation so that the League might be enabled to understand the actual conditions prevailing. in the Far East.

Unfortunately, however, the condition of Manchuria showed no immediate improvement in the matter of peace and order owing to the continued activities of Chang Hamphliang, while the feelings of the Chinese and the Japanese peoples became further strained with the result that there was no possibility of withdrawing the Japanese treeps within the railway zone under the then existing circumstance. When the Council met again in Octobor, Japan realized the importance of allaying the excited national faslings of the two peoples as the first essential condition of securing the safety of the lives and property of Japanose subjects and of making possible the withdrawal of the Japanese troops. She was convinced that for this purpose it was nocessary for the two parties concerned to pave the way for direct negetiations with the object of restoring normal relations between the two countries. Japan took pains to explain this view to the President and certain Members of the Council, but the proposal to initiate direct negotiations was not accepted.

Moreover, the Council formed a plan to invite a representative of the United States, a non-Member State of the League, to participate in its deliberations as an observer. To this proposition Japan raised an objection, contending that participation LLF LOC , 250-B

League is centrary to its constitution, but the other Members of the Council insisted on regarding the step as a more matter of precedure and they invited a United States observer to the Council. Japan remained convinced that this was a matter which concerned the constitution of the League and that the action of the majority constituted a clear case of violation of the Covenant. It became apparent that if the opinion of her fellow members was that such an important matter of substance could be decided by a majority as a more matter of precedure, she had ratified the Covenant under an error. However, owing to her strong desire to upheld the cause of the Council.

The discrepancy between the views of the other Members of the League and those entertained by Japan arose from a lack of understanding of the far Eastern situation on the part of the League. In her desire to assist the League and to maintain its legitimate influence and usefulness, Japan proposed at the Council meeting held in November, 1931, that the League should dispatch a Commission of Enquiry to China so that its members might be able to understand fully the actual conditions prevailing in that country. This proposal was adopted by the Council in its Resolution of December 10.

The Commission of Enquiry

DEN INU N EDU-D

In March, 1932, by way of Japan and ontered Manchoukuo in April.

Japan rendered every facility to the Commission in order to assist its investigations. Through the establishment of the new State of Manchoukuo, especial difficulty was encountered in the matter of the entrance of the Chinese Assessor into the territory of that State. Japan therefore exerted her good offices with Manchoukuo in order to smooth ever this difficulty and enabled the Commission to carry out its investigations.

The Report of the Commission of Enquiry was made public on October 1, 1932. On account of the brief period allowed for the investigation of the Commission, much remained to be desired for the Report to claim to present a true picture of the actual condition of China. Accordingly, Japan, on November 18 last, handed to the League her observations on the Lytton Report in order to provide it with accurate material for coming to a fair conclusion on the questions involved.

The Lytton Report was the subject of deliberation by the Council from November 21 and by Assembly from December 6, 1932. The Committee of Ninoteon appointed by the Assembly without the concurrence of Japan drafted on December 15 a Resolution and a Statement of Reasons concerning the procedure to be followed in performing the du y of conciliation which devolved upon that body in accordance with Daragraph 3 of Article 15 of the Covenant. Japan proposed the deletion from the Draft Resolution of passages regarding the participation of states which were not Members of the League and also the modification of certain points relating to the competence of proposed Committee of Conciliation as well

LLF LOC , 250-B

as the entire deletion of the last Paragraph of the Statement of Reasons which declared in particular that the maintenance and recognition of the present regime in Manchuris could not be considered as solution.

At the same time, considering that Paragraph 3 of Article
15 represents the final resert provided for in the Covenant
for conciliatory solution of a dispute. Japan endeavoured to
discover some compromise which would enable her to continue her
co-operation with the League.

As stated in Part II, M of the Report, the President of the Committee and the Secretary General were authorized to enter into conversations with both the Japanese and Chinese Dolegations. The conversations between the Japanese Delegation and the Socratary Conoral were carried on from the first part of January, 1933. As a result of those conversations, a draft was drawn up and it was referred with the knowledge of the President of the Committee to the Japanese Government for their approval. Subsequently, when amendments of the Japanese Government to this draft were communicated to the Committee of Nineteen, it was made known to the Japanese Delegation that the said draft could not be taken up as a basis of further negotiation. This caused a great surprise to the Japanese Government as they had every reason to believe that the President of the Committee who torother with the Secretary General was authorized to conduct negotiations with the both Delegations was also fully aware of the conversations and raised no objection to the preparation of the draft.

Though the Committee finally agreed to the deletion from the

LEF LUC , 250-B

Draft Resolution of passages relating to the participation of Non-Member States in the work of the proposed Committee of Conciliation, but proposed that the Japanese Government accept the rest of the text of the Rosclution and the Statement of Reasons of December 15 and the a reservation in regard to the last Paragraph of the Statement of Reasons to which Japan had taken objection. The decla tion contained in this Paragraph would, as is stated elsewhere in the present statement, not only constitute an action ultra viros on the part of the League but prejudice the whole question and imply a direct attack on the policy followed by the Japanese Government with respect to the existence of Manchoukuc. Furthermore, such an attitude on the part of the League was in no way in accord with the idea of conciliation advocated by the Committee of Nineteen as well as by the Japanese Government. For these reasons, Japan found it impossible to accept the proposal of the Committee.

Upon the refusal of the J panese Dolegation to agree to the Committee's proposal in thi regard, the latter set out to the procedure of drafting a Rep at under Paragraph 4 of Article 15.

However, the Japanese Government refused to give up the hope for conditiation and in their final efforts to schieve this end they have to withdraw the various amendments which they had presented when the text of Docember 15 was communicated to them and consented to accept as the basis of conciliation the principles and conclusions of Chapter 9 of the Lytton Report, in so far as they were applied in a way to "harmonize with the events which have taken place," which phrase is an almost literal

1 44 20 6 1 150-15

quotation from that Report itself. Further they agreed to the maintenance of the last Paragraph of the President's Declaration (formerly called the Statement of Reasons) on the condition that its wording be modified in such a way that it would not appear to constitute a prejudgment and an attack directed against the policy of the Japanese Government vis-a-vis Manchoukuc.

The Committee of Nineteen found this final proposal likewise unacceptable. Thus the Committee rejected all the Japanese proposals and came to the conclusion that conciliation under Paragraph 3 was impossible. The Committee forthwith proceeded with the drafting of a report under Paragraph 4 of Article 15 of the Covenant, The Draft Report thus propared was submitted to the Assembly on February 21 and, in spite of the negative vote on the part of Japan, it was adopted by the Assembly on February 24.

## Part II

Errors in the Report concerning the chief characteristics of the dispute.

The Report sets forth in Part III what are termed the "chief characteristics of the dispute". It is most regrettable that this part of the Report is substantially based upon the Report of the Commission of Enquiry. As stated in that Report, "the issues involved in this conflict are not as simple as they are often representated to be. They are, on the contrary, exceedingly complicated and only an intimate knowledge of all the facts as well as of their historical background should entitle anyone to express a definite opinion upon them". It must be remembered that the Commission of Enquiry spont only six weeks in Manchuria and fifteen in China, most of which was passed in Peiping and their trip covered only a very

limited area of China a few open ports where the real condition of China could not have throughly been studied. In these circumstance it was impossible for them to acquire "an intimate knowledge of all the facts as well as their historical background." Hence the document is not as complete and impartial as it should be. It is quito natural that there should be not a few errors in the Report of the Assembly which was drafted upon the basis of the Lytton Report. Those errors might have been avaided if the Committee of Nineteen had taken into due consideration the Observations of the Japanese Greenment presented to the Council on Movember 18, 1932. At any rate, it must be said that the Lytten Report, admirable and praiseworthy as it is, is not a document which one can look upon as containing all the facts as well as all the historical background upon which alone final judgment should be based. The errors in the Ropert of the Assembly are numerous. Let only the most salient be citod:

(1) The Report appears to cling in Part III to the fiction that China exists today as a single organized state to be dealt with on the same feeting as any country in Europe or America. The fiction happens to be merely a convenient formula which embodies in a concise form the generous aspirations of the Powers for the recovery of China as a unified and orderly state. Japan has worked hard to not upon that formula during those many years, and she is prepared to continue on the same lines in cases where ordinary matters alone are concerned. But where her vital necessities come into play as in Manchuria, she is forced to reconsider that fiction and to ask herself what are the actual facts and who are the actual

WW 1 LOC # 250-B

rulers. States which are Members of the League of Nations and have little interests in China can afford to preserve the convenient fiction intact without serious difficulty. But Japan in a totally different position economically and strategically is compelled, however, reductantly to exemine and set a limit to the fiction and to direct her course according to realities.

It is the view of the Japanese Government that the erstwhile Chinese state coased to rule in Manchuria when "the fall of the United Republic after the death of Yuan Shi-kai in 1915 signalized the break-up of all unity of a ternment in China". (Observations of the Japanese Government, page 15).

As a matter of fact, none of the Governments including the Nanking Government maintains a thority over Chine save over the limited areas which it actual' centrals. That is why the Japanese Government in their Observations insist that Manchuria is not naturally and necessarily on integral part of China. It will then be asked, as it has been asked, --- why did Japan invoke the Nanking Government at the cutset of the Manchurian incident? Why did Japan negotiato with Peking in 1915? Why did she doclars Manchuria to be a part of China in 1922?" The answer is that Japan clung until the last mement to the fiction of Manchuria being an integral part of China. She had excellent apportunities of departing from it, is she had wished, afforded by the chartic state of the country She stendily refrained from av iling herself of the opportunities. But when chaos came to threat her whole position in Manchuria, it became necessary for her to the measures to protect her various interests and important right:

LEF . JO , 550-B

It should be observed at this point that Japan is not setting a procedent for defying the existence of a neighbour state merely because it is weak or disturbed by internal disruption. It is needless to say that so long as the government of a state which has actually ruled the whole area ma inteins its authority in any part of its territory, so long does the state continue to subsist and to remain inviciable. The poculiar circumstances of China do not reside in the fact that its common government is weak or distracted by disruption. They reside in the unique fact that no authority which now exists has ever been a common government of China at all and none therefore has title to rule the entire country.

The Leauge of Nations should not forget that fact overrides form and that a state must possess a single and continuous government.

(2) The Report, in agreeing that the Chinese beyontt against Japan imposed after the September 18 Incident falls within the province of retaliatory measures, sows the seeds of incalculable future trouble for each and every fewer interested in China. All the Major Powers conduct military operations in China under certain circumstances and maintain armed forces in Chinese territory for that specific purpose. If the adoption by the Powers of any foreible measure for the protection of their rights and interests is an each occasion to be the subject of a retaliatory beyont, the application of force will of necessity be extended without limit.

By their acceptance of the Resolutions of September 30 and of December 10, 1931, China and Japan agreed that they should take the necessary measures to provent any agravation of the situation. The Japanese Government desire to call the attention of the League

DLF LOC " 250-B

to the fact that it was the conspicuous failure on the part of China to take such proper measures that led to the regrettable Shanghai Incident. It should also be added that in any discussion of the beyont the fact of anti-foreign education in schools and the "revolutionary foreign project" (admitted by the Nanking Gevernment) should not be le't out of consideration, as these three subjects are inseparably bound together.

- (3) The Report quotes and adopts from the Lytton Report the reference to the possibility of an arbitral settlement of the Sinc-Japanese dispute. But arbitration prosupposes a normal eganized state with a government suprement throughout its territory and capable of enforcing an award. China, as has been stated above, has not for years been in such a state at any rate so far as to render it possible to arbitrate with her in vital matters concerning Manchuria, with whom would the arbitration have proceeded? With Chang Hauch-liang whom the League dies not recognize? Or with the Nanking Government whose authority (as the Report of the Commission of Enquiry showed) he did not aboy? Japan with her vital interests at stake could not an country as China.
  - (4) The Report again cuctes and adopts the refusal of the Commission of Enquiry to recognize as measures of self-defence the military operations of the Japanese army on the night of September 18, Ithough it does not exclude the possibility that the Japanese officers on the spot might have thought they were acting in self-defence. This is simply another case of a facile and uncritical acceptance of the opinions of the Commission of Enquiry, utterly

MAR 100 , 250-B

ignoring the emphatic contradiction contained in the Observations of the Japanese Government. On what grounds can the League or any other third party preneunce a verdict on the case contrary to the judgement of the Japanese officers on the spot? The right of selfdofonce is one of those inclienable rights of a state which may be duly exercised in certain specific circumstances, and the question of on what accesion and to what extent that right should be exercise is a matter which can be determined only by the state concerned. In this conrection the Japanese Government in their Observations have referred to the reservations made by both France and the United States in concluding the Pact of Paris; a reference which the Assembly found it possible to pass over in silence.

The Report in stating that the operations of the Japanese army, viewed as a whole as they developed through the entire period of the ornfliot, cannot be regarded as an act of self-defence, fails to take into econizance the tension which existed, the everwhelming " forces by which the Japanese were faced and the utter unorthinty which prevailed as to the probable action of these forces. Above all, it fails to take into account the wital rights and interests of Japan in Manchuria, which are not confined to the leased territory and the railways, but involve mining and forestry, consular police and consular jurisdiction, residence and trade throughout the entire region. When these rights and interests are threatened, the measures for their protection may have to be extended throughout Manchuria. But never have Japanese militery operations exceeded the bounds of necessity for solf-protection.

233 200 j 250-B

In order that it may not be supposed to have been passed over sub silontic, the Japanese Government take this opportunity of explicitly denying the spaific ecnolusion reached in the Report that no question can arise of Chinese responsibility for the development of events since September 18, 1931, and that the use of bryentts by China subsequent to that date fails under the category of roprisals. Evon if the thoory that the Japanese military action did not constitute lawful solf-defence should be accepted, that clearly would not invest the Chinese with an unlimited license to behave as they chose to, and to enter upon a career of unrestricted victores and wrong. Much more is this the case if, as Japan contend the actions of hor troops were urgently called for by the necessitie of self-defence. How can reprisals massibly be exercised against a lawful act? The propor reply to acts of self-defence is negotiation and explanation, and not reprisals which generally lead to war. Had the United States exercised reprisals in the Carelina case, war with England must have ensued. Again, it must be noted that the Roselution of September 30 procludes either party from aggravating the situation; and it would soom strange to hold that this meant that China might take stops which would cortainly aggravate it, leav ing Japan alone responsible for any untoward development.

What appears to be a most curious statement is found in Part

III of the Report which reads: "adoption of measures of self-defence

does not exempt a state from complying with the provisions of

Article 12 of the Governant".

As has already been observed by the Japanese Government, the right of self-defence is exercised upon the occasion "of an urgent"

MAN LUC W 250-B

allowing no choice of means and no instant for deliberation." To require the observance upon such an occasion of Article 12 of the Commant, which stipulates that the right of self-defence may be exercised three menths after the award by the arbitrators or the judicial decision or the Report by the Council of the League has been made public is to dony the right of self-defence itself.

- Mancheukue was not spentaneous. Since the statement is based upon no fresh investigation conducted at a later date, it may be readily gathered that the Report has here again adopted the erromocus conclusions of the Commission of Enquiry contained in Chapter VI of the latter's Report, the baselessness of which has been fully exposed in the observations of the Japanese Government.
- the Assembly repeats this finding of the Commission of Enquiry in face of the emphatic denials of Japan. There are two factors which may partly account for this. First, the movement during the tyran-nous regime of the Changs for the keeping of Manchuria alcof from all participation in the affairs of China Proper was subterranean, and had no repercussions in the cutside world; and the authors of the Report may therefore have been sceptical of its existence.

  Secondly, they appear to be misled by giving implicit policy of Japan, and her supposed plan to seek a political solution of the Manchurian issue as a step towards the execution of that policy. It is unnecessary to repeat that the Japanese "continental policy" is a more Chinese fabrication, and that Japan harbours no territor rial designs in any part of the world. But all this, though it

DEF LUC # 250-B

may explain the rejection by the Assembly of the uncompremising denial made by Japan, can hardly be thought to excuse it.

The simple fact is that, as has so often been explained on the disappearance of all the administrative organisations, such as they were jowhich had existed under the Changs, spentaneous local organisations naturally sprung up, and the Japanese troops which were responsible for the maintenance of order necessarily co-operated with them. It was a proper and necessary step, and in the circumstances an unavoidable one. Such was the whole significance of the presence of Japanese troops, and such was the sole aim of the activities of Japanese civil and military officers. Unfortunately the Commission of Enquiry, and consequently the Assembly, in their implicit reliance on the assumption that there had never existed any independence movement in Manchuria, have been obliged to attribute to the activities of Japanese civil and military officers the independence which was actually proclaimed, ---and to do so upon no solid grounds whatever.

As to the assertion that the people of Manchuria are hostile to the new state, again there is no volid evidence beyond fifteen hundr letters of dubicus origin received by the Commission of Enquiry. The Japanese Government desire to point out the fact that within less than a year since its foundation, Manchoukuo has achieved a marked and healthy progress in the restoration of law and order, and that a criticism or complaint has been heard of regarding its conduct of affairs, whether domestic or foreign.

Regardless of the attitude of the Assembly to the new state of Manchoukue, she has gone forward stendily on the road of progress.

Freed from the yoke of misgovernment under the tyrannous rule of -15-

DET 100 , 250-B

and Chinese all alike, have already begun to reap the benefits of their labours which were decided them in former days, Throughout most of the country banditry has been suppressed. These hestile elements, largely composed of the remnants of Chang Hauch-liang's troops and receiving not inconsiderable assistance from their former war lord, had constituted an obstatele to the establishment of peace throughout the territory. Thanks however to the combined efforts of the Japanese and Manchoukue forces, they have been practically cleared out of the Provinces of Fongtien, Kirin, and Heilungkang, and the security of life and property has been recetablished in those Provinces. It is only in the Province of Jehol that the organized opecation still continues.

In the demain of finance, semething entirely unknown in the history of China has been realized in Mancheukue, Though the State is still in its infancy, a sound budgetary system has been initiated, and is being carried out with utmost satisfaction. The establishment of the central bank, which is functioning on the same lines as those of the advanced countries of the world, has contributed much to the stabilization of state finances and to the scenemic and industrial development of the country. A similar progress has also been noted in the demain of railway administration, commerce, and industry, and with abundant resources with which she is endowed, there is every prospect of this country achieving, in days to come, a still greater progress along these lines to the benefit of her inhabitants and foreigners.

the country boon hestile or even sullenly submissive. It is to be

DEF LOC . 250-B

regretted therefore that the Assembly should have, without referring to the Observations submitted by Japan, accepted the assumption of to Commission of Enquiry, which, here again, has no foundation in fact.

(6) The Report dwells upon the need of international on-operation in the reconstruction of China, and mentions the provision of tochnical assistance as one form of that international on-operation. Obviously, the reconstruction of China cannot be accomplished by any such superficial and inadequate means. It could only be rendered possible by some forceful international intervention of such a nature as would at once prove incompatible with the stipulations of the Nin Power Treaty regarding the administrative integrity and political in dependence of China. That is another proof that it is necessary to allow ample elasticity by taking due account of changing conditions is the application of the Nine Power Treaty and the Covenant of the League as far as China is concerned.

## Part III.

Impracticabilities of the Recommedations.

- (1) Japan recognizes that the Covenant of the League of Nation and the Pact of Paris constitute the basic principles of the settlement of international disputes in so far as international relations in general are concerned. But a certain degree of elasticity must be allowed in the application of these principles to such special and entirely abnormal conditions as prevail in China.
- (2) As to the proposal for the withdrawal of troops, contained in Section II, (1), (A) of Part IV of the Report, it is to be noted that the presence of Japanese troops outside the Railway Zone, so far from being incompatible with legal principles, has from the very beginning been due entirely to the sheer necessities.

LIF LOC # 250-B

of 1 -ful solf-defence, and is in ne way deregatory to the accepted principles regarding the settlement of international disputes. It is further to be noted that these Japanese troops are new responsible, in accordance with the Japan-Mancheukue Pretecel, for the maintenance of peace and order in Manchaukur. It is true that by the resolutions of September 30 and of December 10, 1931, Japan undertock to withdraw her treeps within the Railway Zone in se far as the safety of the lives and property of her subjects was assured, but the condition attaching to that undertaking, namely the assurance of safety of life and property, has nover been satisfied; and the undertaking itself has new become inapplicable on account of the independence of Manchoukue and the conclusion of the agreements embedied in the Protectl signed on September 15 last. Should the Japanese troops be withdrawn within the Railway Zone in accordance with the recommendation contained in the Report, it would be inevitable that unrest and disturbances would onsue in the evacuated territory. These Members of the Longue that have but little direct interest in the affairs of the Far East can afford to maintain that the upholding of abstract formulae is more important than the maintenance of the peace in this part of the world. But Japan, vitally concerned in the maintenance of poace and order in Manchuria, cannot telerate that region again be plunged into disorder. It cannot be supposed that a gendarmorie system as proposed by the Lytton Report would remove all approhonsions on this score. There is no precedent in the history of the world in which the socurity of such a vast territory was socured by gondarmorio. The proposition is absurd and cannot be put into practice. If the Japanese troops were withdrawn, the country would be quickly everrun by bandits and by

LEF LOC W 250+B

Chang Housh-Mang's troops resulting in anarchy and disorder.

(3) As to Section 2, (1) of art IV of the Report where it is stated that the severeignt, ever Manchuria belongs to China, it has to be noted that at any rate since the year 1916 Manchuria has never been subject to the authority of China and that, in the final analysis, the present difficulty has been caused by the supposition that the savereignty of China actuall extended and extends to that region. It is entirely su orflous to say that the enforcement of this fiction will never ensure the cotection of Japan's rights and interests and the mainte mance of peace in the Far East. Inasmuch as the Roport repudiates the restoration of the old regime as leading merely to a repotition of disorder and friction, so any return to the fiction in question must equally be repudiated. Nor is it possible for Japan to admit any clicy which is incompatible with the simple fact of the obstance of the State of Manchaukue and the provisions of the Japar - choukur Pretocal. to +(4) With regard to the to principles set out in the Lytton Report and cited in Section I of Part IV of the Report, apart from

the observations made above, the Japanese Government doem it sufficient to quote the following passages from their Observations presen ed to the Lague in Nove ber last: --

"Cortain of these principles to which the Japanese Government have no foundemental objection have lready found concrete application in the Protocol signed by Japan and Manchoukug. But, in any view of the matter, it must evidently be impossible, so long as the aparchical state of the ings in Chine persists, to arrive at a satisfactory solution of the questions at issue on the basis of the first nine of these principles, especially inciples 4-9 inclusive. As

1 = 100 % 250-B

is sustained in Principle 10, these nine principles cannot be practically applied 'without a strong central government in China'."

- (5) In Section 2, (3) of Part IV of the Report, the Assembly contemplates the establishment of a committee to assist in the nego tiations which are to be opened between the two parties in accordan with the method specified in the Report. This, however, is directlentary to the insistence of Japan not to allow any third party to intervene in the Manchurian problem, and Japan find it absolutely impossible to accept such a proposal. As, mercover, the Recommendations referred to as (1), (A) and (1), (B) of Section 2, Part IV of the Report, must be dismissed as unpractical, and those made und (2) of the said Section 2 are equally inapplicable in the present state of China, there would seem to be no scope left for the activities of the proposed Committee.
  - (6) The Report states in effect in Section 3 of Part IV that the maintenance and recognition of the existing regime in Manchuri is no solution and that the Members of the League should, after having adopted the Report, abstain from recognizing the present regime either do jurg or do facto. Further it expresses the hope that the states non-Members of the League who are signatories of the Paris and the Nine Power Treaty will associate themselves with the view set forth in the Report in this regard. The Japanes Government cannot but consider that the Assembly, in proposing in such a manner to influence or to bind, if only morally, both Membe and non-Member states in the matter of recognizing or not recognizant another state is exceeding its powers conferred upon it by Article 15 of the Covenant. In any case, in making a proposition of this nature the League of Nations whose primary duty is the preservation-

1 10 C , 250-B

of peace throughout the world could not surely contribute to the maintenance of peace and security not only in Manchoukur, but also in the Far East. Such an action on the part of the League would prove to be an obstacle to the good understanding and friendly relations between nations upon which peace depends.

Part IV.

Conclusion.

The Japanese Government are fully convinced that the action of the Japanese army on the night of September 18, 1931, and thereafter has never exceeded the limits appropriate to measures of solf-defence, and that Mancheukue has been founded by the spentaneous will of the people of Manchuria. Accordingly, they consider that neither the action of the Japanose army in Manchuria, nor the conclusion of the Japan-Mancheukur Protocol is in violation of the Covenant of the League of Nations, the Nine Power Treaty, the Pact of Paris, or any other international treaties. The Japanese Government maintain that in view of the quite abnormal condition of China, where no existing authority has ever ruled the entire country, and particularly in view of the unparalleled complexity and poculiarity of the Manchuria problem, and also having regard to antiforeign character of the poli cy of the National Government it is impossible to think of applying to the present dispute the general formulae applicable to an ordinar international question; and they maintain margaver that neither any procedure which may be adopted for such an exceptional case, nor any solution thereby attained, can ever establish a precedent for ordinary cases of international dispute. Were it possible to apply ordinary formulas, the plans adumbrated by the Assembly would themselves be ruled out of consideration as interferences with what the

LAF . 00 % L. - 13

Assembly regards as Chinese severei n rights.

Unfortunately, the Assently, through the refusal of its Member to face facts, and their uncritical oceptance of the Report of the Commission of Enquiry, has only indulged in academic and inadequate principles. The Assembly stands, if it may so be said, for mere formulae; Japan for solid reclities. Japan takes her stand on established principles; the Assembly on proconceived hypotheses. It results from the refusal of the is ably to go beyond the Lytton Rope As printed out in the preceding part of the present statement, the new State of Mancheukue has made rapid progress. Peace and order are superseding banditry. Commerce and industry have responded to the improved situation, to the benefit of foreigners and the people of Manchoukuc alike. This is a concrete proof of the truth of the Japanese sentention that the recognition and encouragement of the Manchurian State is the culy read a satisfactory solution of the Manchurian question and to the main senance of a lasting peace in the Orient.

on the other hand, it appears mossible to look for any improvement in the Chinese situation in the mean future, and China is likely to remain a chronic anxiety to the rest of the world.

Communism has already invaded China, and the alarming extent and success of the invasion is far to seldem realized. A communized China would constitute a problem for Europe and America beside which other questions would pale into insignificance. But a Manchu free from Chinese connection constitutes a barrier to the communist danger in the Far East. Its value ought surely to be apparent to every statesman. It is earnestly head that the League of Nations will see he led to change its attitude, to discard reliance on

forces that are actually rendering possible the maintenance of paace in the various regions of the world. The Covenant of the League of Nations itself provides in Article 21 for the due recognition of regional understandings, and the Japan-Manchaukue Protectl of September 15, 1932, falls incontestably within the category of understandings such as these, as the special interests of Japan in Mancharia have again and again been recognized. At the same time, Japan takes this apportunity of repeating her disclaimer of all desire for territorial gains or commercial advantages.
